Journal of Hydrology 166 (1995) 479–480

Journal of Hydrology

Contents of Volume 166

Vol. 166 Nos. 1–2 March 1995

Research Papers

A method for measuring free CO_2 in upland streamwater using headspace analysis
D. Hope, J.J.C. Dawson, M.S. Cresser and M.F. Billett 1

Soilwater chemistry in a holm oak (*Quercus ilex*) forest: inferences on biogeochemical processes for a montane-Mediterranean area
A. Avila, D. Bonilla, F. Rodà, J. Piñol and C. Neal 15

Transport of atrazine, 2,4-D, and dicamba through preferential flowpaths in an unsaturated claypan soil near Centralia, Missouri
J.A. Tindall and K. Vencill 37

Stream chemistry in the middle hills and high mountains of the Himalayas, Nepal
A. Jenkins, W.T. Sloan and B.J. Cosby 61

Homogeneity tests based upon Gumbel distribution and a critical appraisal of Dalrymple's test
H.D. Fill and J.R. Stedinger 81

Simulated water balance of Scots pine stands in Sweden for different climate change scenarios
A.I. Gärdenäs and P.-E. Jansson 107

The evaluation of the flowmeter test in three-layer aquifers and the influence of disturbed zones
J. Xiang 127

A geomorphologic non-linear cascade (GNC) model for estimation of floods from small alpine watersheds
D.D. Bérod, V.P. Singh, D. Devred and A. Musy 147

Determination of the origin of the waters of Köyceğiz Lake, Turkey
C. Serdar Bayarı, N. Kazancı, H. Koyuncu, S.S. Çağlar and D. Gökçe 171

Vol. 166 Nos. 3–4 April 1995

Special Issue: Atmospheric and Hydrological Processes at the Soil–Vegetation–Atmosphere Interface

Preface vii

Comparison of energy fluxes calculated with the Penman–Monteith equation and the vegetation models SiB and Cupid
M.G. Inclán and R. Forkel 193

A simple soil–plant–atmosphere transfer model (SISPAT) development and field verification
I. Braud, A.C. Dantas-Antonino, M. Vauclin, J.L. Thony and P. Ruelle 213

Accommodation between transpiring vegetation and the convective boundary layer
J.L. Monteith 251

Estimation of evapotranspiration from a millet crop in the Sahel combining sap flow, leaf area index and eddy correlation technique
H. Soegaard and E. Boegh 265

A re-evaluation of the Webb correction using density-weighted averages
G. Kramm, R. Dlugi and D.H. Lenschow 283

Implementation of near-field dispersion in a simple two-layer surface resistance model
B.J.J.M. van den Hurk and K.G. McNaughton 293

Vertical and horizontal distribution of wind speed and air temperature in a dense vegetation canopy
A.F.G. Jacobs, J.H. van Boxel and R.M.M. El-Kilani 313
The Crau field experiment: turbulent exchange in the surface layer under conditions of strong local advection
L.J.M. Kroon and H.A.R. de Bruin 327
Estimation of regional heat and moisture fluxes in homogeneous terrain with bluff roughness elements
M. Claussen 353
Flux aggregation at large scales: on the limits of validity of the concept of blending height
M. Claussen 371
Heat and moisture flux profiles in a region with inhomogeneous surface evaporation
B.I. Michels and A.M. Jochum 383
Occult precipitation: sampling, chemical analysis and process modelling in the Sumava Mts. (Czech Republic) and in the Taunus Mts. (Germany)
V. Elias, M. Tesar and J. Buchtele 409
The introduction of macroscale hydrological complexity into land surface-atmosphere transfer models and the effect on planetary boundary layer development
P. Quinn, K. Beven and A. Culf 421
Evaluation of surface soil moisture distribution by means of SAR remote sensing techniques and conceptual hydrological modelling
A. Giacomelli, U. Bacchiega, P.A. Troch and M. Mancini 445
Distributed estimation of incoming direct solar radiation over a drainage basin
R. Ranzi and R. Rosso 461
